Retaining Clip, Combi Block Inlet/Outlet (59200188)

Applicable Boiler Models

- Tx151C

Kit Contents

- 1 Retaining Clip

Tools Required

- 1/4" Nut Driver

Replacement Instructions

- 1) Turn off power and gas to the boiler.
- 2) Drain boiler of water.
- 3) Remove clip by rotating counter clockwise until it snaps out of place.
- 4) Replace clip by fitting it into place, pushing, and then rotating clockwise until it "clicks" into place.

Note: Clip will only fit one way. (See figures on the right)

- 5) Refill boiler with water and purge excess air.

CAUTION

Air in Boiler - Ensure the boiler is completely filled with water to a minimum of 15psi, and that all the air is purged. Failure to do so could result in a boiler malfunction causing property damage.
