Low-Loss Header Kit

TRX150/199/199C & FTVN Low Loss Header Kit

Overview:

The LLH Kit is designed to easily connect to an NTI FTVN or TRX150/199/199C boiler, without the need for cutting, threading, or soldering, to form the primary loop for the boiler. The kit includes an isolation valve, IWH return cap and gaskets.

Kit Contents:

Item	P/N	Description	Qty
A	64980720	Primary Loop Supply Pipe	1
B	64980721	Primary Loop Return Pipe	1
C	64980719	Isolation Valve, 1-1/4" M BSPP	1
D	64980696	Gasket, 1-1/4"	4
E	64980701	Gasket, 1"	1
F	6000087262	Cap, Brass 1" (IWH return cap)	1
G	87263	Assembly Instructions (this document)	1

Assembly Instructions:

Loosely install pipes (A) and (B) together with isolation valve (C) onto the boiler; use 1-1/4" gaskets (D) at each connection. Fix the brass cap (F) with 1" gasket (E) to the return pipe. Install the Tridicator (included with the boiler) to the supply pipe; use thread sealant on the threads. Ensure all connections are firmly tightened – check for leaks.
